

PMAC | PRINCE MAHIDOL
AWARD CONFERENCE **2018**

PARALLEL SESSION 4.2

MULTI-SECTORAL PARTNERSHIPS FOR ACTION ON AMR

| BACKGROUND

Antimicrobial Resistance (AMR) respects no borders and has become an increasing threat to all countries - developed and developing alike. Common infections become untreatable, devastating infectious diseases become much more difficult to contain and standard medical procedures become a challenge. Thus, AMR has a major negative impact on growth and global economic stability. Given the breadth of impact from AMR, the only effective means to address AMR sustainably is through multisectoral action and partnership; however, challenges have been identified as to how stakeholders from different sectors can meaningfully come together to produce action and change. Innovative new approaches are needed to truly harness the potential of all people and perspectives, particularly those most vulnerable.

The UN Sustainable Development Goals (SDGs) recognize the importance of AMR (paragraph 26 of the Declaration). The attainment of many of them will depend on the availability of and access to affordable and effective antimicrobial medicines and other technologies such as diagnostic tests. AMR seriously threatens the health and lives of vulnerable populations, such as newborns, children, and women, as well as sustainable food and agriculture production and a healthy environment. AMR is reducing our ability to protect the health of animals and therefore is threatening safe and sustainable food and agriculture.

In a tripartite approach, WHO, the Food and Agriculture Organization (FAO) and the World Organization for Animal Health (OIE) recognize that addressing health risks at the human-animal-plant-ecosystems interfaces requires strong partnerships among entities that may have different perspectives and much work is currently ongoing.

On 21 September 2016, the President of the UN General Assembly convened a one-day high-level meeting at the UN Headquarters on AMR with the participation of Member States, non-governmental organizations, representatives of civil society, the private sector and academic institutions. The primary objective of the meeting was to summon and maintain strong national, regional and international political commitment in addressing AMR and the meeting emphasized the important role and responsibilities of governments, as well as the roles of non-State actors, the private sector and relevant inter-governmental organizations, particularly the WHO, FAO and OIE in establishing, implementing and sustaining a cooperative global, multi-sectoral and cross-sectoral approach.

| OBJECTIVES

- How can the world come together to meaningfully and effectively address AMR in a sustainable way and in particular, engage non-traditional partners?
- Multisectoral partnerships have been identified as essential for addressing AMR - how can the world now move from planning to action at both the international and local levels?
- How does addressing AMR contribute to the attainment of the SDG's? How to effectively engage all relevant sectors: environment, food, employment, poverty reduction, agriculture, development partners, academia, private sector, etc.?
- How can the voice of all people be heard, particularly those marginalized and most vulnerable?
- What are the issues and opportunities around ensuring linkage between global and community/country-level partnerships? How can partnerships focus on possibilities for meaningful collaboration, action on the ground and specific problems affecting communities rather than focusing only on the broader policy levels?
- What are some good practices and lessons learned from past multisectoral collaborations that could be applied to collaborations on AMR?

Moderator

Matthew Stone

Deputy Director General

World Organisation for Animal Health
France

Matthew Stone is a veterinary epidemiologist from New Zealand, and the Deputy Director General – International Standards and Science at the World Organisation for Animal Health (OIE) at their Paris headquarters. He gained his Bachelor and Master degrees in veterinary science and veterinary epidemiology from Massey University, New Zealand, and after five years in mixed veterinary practice joined the government veterinary authority of New Zealand, the Ministry for Primary Industries. Over a 20 year period Matthew worked in numerous veterinary and management roles, with responsibilities for international trade, surveillance, incursion investigation, incursion response, food safety and animal welfare. He became the New Zealand Delegate to the OIE, and in that capacity served as the Secretary General for the OIE Asia Far East and Oceania region. Matthew has served as President of the Epidemiology Branch of the New Zealand Veterinary Association; and as a member of the Professional Standards Committee of the New Zealand Veterinary Council; the Stakeholder Council for the New Zealand Tb Free and National Animal Identification and Traceability programmes; and the Wellington SPCA Board.

Panelist

Anna Marie Celina Garfin

National TB Program Manager

Department of Health
Philippines

ANNA MARIE CELINA G. GARFIN, MD, MM 62 Iba Street, Barangay Sta. Teresita, Quezon City, 1114 Philippines Mobile: +63917821-9809 Email: garfinamc@gmail.com Professional Experience Medical Specialist IV - November 06, 2000 to Present - Department of Health - Disease Prevention and Control Bureau, San Lazaro Compound, Sta. Cruz, Manila Development of policies, programs and guidelines pertaining to TB control in consultation with partners and other stakeholders. Provide technical assistance and advisory services to the DOH-Regional Offices, partner agencies and other stakeholders. Coordinates/collaborates with other agencies and stakeholders related to infectious disease prevention and control. Supervise the performance of staff hired through the Global Fund Project. Involve in the planning and conduct of monitoring and evaluation of programs/projects related to tuberculosis. Assist in the planning and conduct of trainings pertaining to tuberculosis. Designated as NTP point person for the Programmatic Management of Drug Resistant TB and TB HIV Collaboration initiatives in 2013, and NTP Manager in December 2015. Medical Specialist III - February 08, 1999 to November 05, 2000 - Department of Health - Tuberculosis Control Service Assist in the planning and conduct of training activities. Coordinate with partners for the conduct of advocacy regarding tuberculosis. Conduct monitoring visits to the different regions, provinces and municipalities. Panelist

Jaana Husu-Kallio

Permanent Secretary

Ministry of Agriculture and Forestry
Finland

Bio sketch of Ms Jaana Husu-Kallio Since February 2012, Jaana Husu-Kallio has been the Permanent Secretary of the Ministry of Agriculture and Forestry of Finland. Since 2016 she has been a chair of the management board of European Food Safety Authority, a member since 2012. Previously her roles included Director-General of the Finnish Food Safety Authority (from 2006) and Deputy-Director General of DG Health and Consumer Protection of the European Commission (from 2002). Before she joined the European Commission she worked in the Finnish Ministry of Agriculture and Forestry as a Chief Veterinary Officer and as the Director-General of the Department of Food and Health. Dr. Husu-Kallio graduated as a veterinarian from the University of Helsinki (1984) and attained a PhD in veterinary microbiology in 1990 and a specialization degree in infectious animal diseases in 1992 from the same university. She has been a member of the Royal Swedish Academy of Agriculture and Forestry since 2004 and received a Doctor Honoris Causa by the Faculty of Agriculture and Forestry of the University of Helsinki in 2008. Since 2014 she has also been the Chairman of the Management Board of the University of Helsinki and a member since 2010.

Panelist

Marc Sprenger

Director of the AMR Secretariat

World Health Organization
Switzerland

Dr Marc Sprenger, a medical doctor and expert in infectious diseases, epidemiology and global health, is Director of the Antimicrobial Resistance Secretariat at the World Health Organization in Geneva since September 2015 and is responsible for the coordination and implementation of the Global Action Plan on AMR. From 2010 till 2015, Dr Sprenger was elected for five years as Director of the European Centre for Disease Prevention and Control (ECDC). From 2003 till 2010, Dr Sprenger was Director General of the Dutch National Institute for Public Health and the Environment (RIVM). As Director of Health (1999-2003) of the Dutch National Healthcare Insurance Board, he provided guidance on health care system and insurance issues, including reimbursement of new pharmaceuticals. As head of the Centre for Infectious Disease Epidemiology, RIVM (1993-1999), Dr Sprenger was responsible for establishing a new centre of national coordination of infectious disease epidemiology and initiated the European Antimicrobial Resistance Surveillance System (EARSS). Dr Sprenger studied General Medicine at University of Maastricht, specializing as a medical microbiologist at Erasmus Medical Center (Rotterdam) and obtained a PhD in Epidemiology at Erasmus University.

Panelist

Maria Lettini

Director

FAIRR Initiative
United Kingdom

Maria Lettini is the Director of the FAIRR Initiative. She is responsible for engaging with institutional investors and related capital markets stakeholders on the risks and opportunities associated with the global food system, with special focus on protein production and consumption. Prior to her role at FAIRR, she spent five years at the UN-supported Principles for Responsible Investment (PRI), leading the PRI's signatory strategy to raise awareness of material sustainability (environmental, social and corporate governance) issues and ensure their incorporation into investment policies and practices. Maria has over twenty years' experience in global investment banking, business and finance, working at both J.P. Morgan and Deutsche Bank. She has been based in San Francisco, New York, Madrid, and most recently, London. Maria holds a MA (Distinction) in Environment, Politics and Globalization from King's College London and a BA in International Business, Latin American Studies and Spanish.

Panelist

Stefano Nobile

Advocacy Officer and Focal Point for Health and HIV

Caritas Internationalis

Switzerland

Stefano Nobile earned a Master Degree in International Relations at the University of Padova, Italy. He joined Caritas Internationalis in 2009, as Advocacy Officer and Focal Point for Health and HIV. His principal responsibility is to coordinate the response of the 165 national members of Caritas Internationalis to pediatric HIV and HIV-TB co-infection, Anti-Microbial Resistance, Non-Communicable Diseases as well as health emergencies preparedness and response. He represents health-related concerns of the members of the Caritas Confederation at international organizations, specialized agencies and other multi-lateral organizations, and advocates for global solutions inspired by person-centered approaches and the principles related to Integral Human Development.
