

PMAC | PRINCE MAHIDOL
AWARD CONFERENCE **2018**

PARALLEL SESSION 4.1

**MOVING FORWARD AND OUTWARD: PROGRESS IN IMPLEMENTATION OF
GLOBAL FRAMEWORKS AND INITIATIVES**

| BACKGROUND

Historically, international organizations, academia and others have provided regulations, standards or guidance to the global community (e.g., International Health Regulations, OIE Terrestrial Animal Health Code, and Codex Alimentarius). However, the challenge at all levels (i.e., globally, regionally, nationally and locally) has been in the actual implementation of these regulations, standards or guidance with the available resources and existing infrastructures. In response to requests from national authorities and as a result of breakdowns or delays in global, regional, national and local responses to emergent diseases, the global community has moved forward to develop frameworks and advance initiatives that further support national and local authorities in their efforts to prevent, detect and respond to human, animal and environmental health concerns. Critical to the utility and effectiveness of these frameworks and initiatives is the ability to build synergy among multiple stakeholder efforts and to address the needs of individual countries and communities.

| OBJECTIVES

- To present a selection of global frameworks and initiatives, discuss the challenges and successes in their implementation and draw lessons to build sustainable, inclusive and effective preparedness and response systems.
- To discuss how these different global frameworks may (or may not) build upon each other or provide opportunities for synergies in supporting national and local capacity building efforts.

Panelist / Panelist

Lucille Blumberg

Microbiologist

National Institute for Communicable Diseases
South Africa

BLUMBERG Lucille Hellen Prof National Institute for Communicable Diseases of the National Health Laboratory Service, South Africa MB BCH MMed (Micro) ID (SA) FFM (RCPS, Glasgow) DTM&H DOH DCH Johannesburg South Africa Email: lucilleb@nicd.ac.za Professor Lucille Blumberg is a Deputy Director of the National Institute for Communicable Diseases, of the National Health Laboratory Service, and currently also medical consultant to the Centre for Emerging and Zoonotic Diseases for rabies and viral haemorrhagic fevers. She has specialist qualifications in clinical microbiology, travel medicine, and infectious diseases. Her special interests are in tropical diseases, travel medicine, malaria, the viral haemorrhagic fevers and rabies. She is a member of a number of South African expert groups on Ebola, rabies, malaria and serves on various WHO Advisory Groups. She established the Mass Gatherings Unit at NICD in 2009 to prepare for and respond to communicable diseases risks for the 2010 FIFA World Cup in South Africa.
