

PMAC | PRINCE MAHIDOL
AWARD CONFERENCE **2018**

PARALLEL SESSION 4.1

**MOVING FORWARD AND OUTWARD: PROGRESS IN IMPLEMENTATION OF
GLOBAL FRAMEWORKS AND INITIATIVES**

| BACKGROUND

Historically, international organizations, academia and others have provided regulations, standards or guidance to the global community (e.g., International Health Regulations, OIE Terrestrial Animal Health Code, and Codex Alimentarius). However, the challenge at all levels (i.e., globally, regionally, nationally and locally) has been in the actual implementation of these regulations, standards or guidance with the available resources and existing infrastructures. In response to requests from national authorities and as a result of breakdowns or delays in global, regional, national and local responses to emergent diseases, the global community has moved forward to develop frameworks and advance initiatives that further support national and local authorities in their efforts to prevent, detect and respond to human, animal and environmental health concerns. Critical to the utility and effectiveness of these frameworks and initiatives is the ability to build synergy among multiple stakeholder efforts and to address the needs of individual countries and communities.

| OBJECTIVES

- To present a selection of global frameworks and initiatives, discuss the challenges and successes in their implementation and draw lessons to build sustainable, inclusive and effective preparedness and response systems.
- To discuss how these different global frameworks may (or may not) build upon each other or provide opportunities for synergies in supporting national and local capacity building efforts.

PRINCE MAHIDOL
AWARD CONFERENCE

2018

Panelist

Stella Chungong

Medical Officer, Department of Communicable Disease, Surveillance and Response

World Health Organization
Switzerland

Dr Chungong is currently chief for the IHR Core Capacity Assessment, Monitoring and Evaluation Unit within the Country Emergency Preparedness department in the WHO Health Emergency Programme. In this role, she is responsible for the WHO support to the IHR Joint External Evaluations, operational readiness, the country planning, simulation exercises and after action reviews, all underpinned by the one health approach. Prior to that she was the coordinator of the Global Preparedness, Surveillance and Response operations unit in WHO Geneva. She has held other coordinator positions in WHO, including for the IHR Monitoring, Procedures and Information Unit, as well as being acting Director for the International Health Regulations Department for a while. She has also worked within the Global Influenza Programme in WHO Geneva, as well as for the Ministry of Health in Cameroon. Dr Chungong has worked with both developing countries and developed countries, across all WHO regions. She holds an MD from the University Center for Health Sciences, Cameroon, a Diploma in Community Medicine from the University of Geneva, and an MPH from the University of Leeds in the UK.
